

MIRSTM offers the WASTE container and manifest management module which handles “cradle to grave” waste tracking and reporting, including manifest, label and biennial report for compliance with the reporting requirements under RCRA subtitle C.

WASTE

stand-alone module

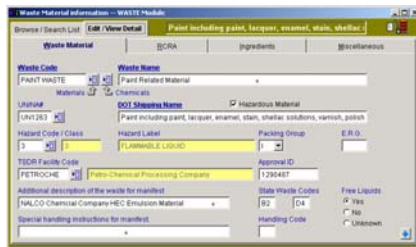

The WASTE module helps you comply with a number of RCRA-related regulatory reporting requirements:

- Maintain waste characterization.
- Manage waste containers as they are generated for manifest preparation.
- Track waste by container, constituent, generator, transporter, disposal facility.
- Account for cost by waste material, generator, disposal facility and transporter, and accommodates recycling credits.

The program alerts you to manifest and storage exceptions.

The WASTE module provides extensive waste management reporting.

Generates manifests, biennial Forms GM and OI, the Site ID form and waste labels using various formats.

WASTE module screen provides waste and manifest tracking for RCRA, Subtitle C compliance.

Produces Report Forms GM and OI, in addition to the Site ID Form. Prints manifests and waste labels.

The WASTE module saves time, by making efficient use of information contained in the program:

- Produces chemical summary by disposal type for Form R.
- Integrates with the FORM R module for reporting transfers of toxic chemicals to off-site facilities.
- Integrates with the SARA module for spill reporting.

RCRA TRAINING

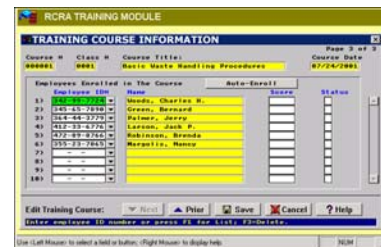

add-on module

WASTE module is required for this add-on module

The RCRA TRAINING add-on module manages employee training, mandated by RCRA.

Use the program to maintain course descriptions and schedules, as well as:

- Create job categories with course requirements and assign employees to one or more job categories.
- Auto-enroll employees in courses for required initial training, as well as recurrent training.
- Track employee performance: completions, grade, pass/fail.

RCRA TRAINING module manages RCRA-mandated employee training. Tracks employees, job categories, training courses and course schedules.
